

Kgomotso Mokhorro

Pretoria, Gauteng • (+27) 71 350 3193
Mokhorro59@gmail.com

Detail-driven and results-oriented BCom Supply Chain Management graduate with hands-on experience in operational coordination and customer service within fast-paced environments. Strong interest in logistics engineering and supply chain analysis, I'm building my foundation in process improvement through Six Sigma methodologies. Passionate about applying logistics thinking, systems knowledge, and data-driven decision-making to real-world operational challenges. Seeking an entry-level opportunity to contribute analytical insight, improve service and process flows, and drive efficiency across supply chain operations.

EDUCATION

Bachelor of Commerce: Supply chain management / 2025
MANCOSA, Durban

PROFESSIONAL DEVELOPMENT & APPLIED LEARNING

Six Sigma Yellow Belt- 2KO Africa (January 2026)

Covered core Six-sigma concepts including the DMAIC framework, process variation and root cause analysis, with exposure to tools such as process mapping, SIPOC, Voice of the customer(VOC), and descriptive statistics. Developed an understanding of how data driven process improvement methodologies are applied to reduce defects.

AI Foundations – Oracle Cloud Infrastructure (July 2025)

Focused on the application of AI concepts within operational and logistics contexts, including automation fundamentals and data interpretation.

Enterprise Resource Planning (ERP) Management – Alison (June 2025)

Covered core ERP concepts including supply chain planning, change management, and system integration, with exposure to SAP-based workflows. Developed understanding of how enterprise systems support end-to-end operational visibility and coordination.

Engineering Project Management – Alison (June 2025)

Developed practical skills in project scheduling, coordination, and stakeholder management, with emphasis on managing timelines and resources in engineering and operations-focused projects.

Business Analysis: Process Modelling – Alison (June 2025)

Applied process mapping and workflow design techniques to analyse and improve business processes. Built capability in identifying inefficiencies and proposing structured process improvements.

Microsoft Excel: Basic to Intermediate – Cursa (December 2024)

Developed strong analytical capability including data cleaning, lookup functions, PivotTables, and dashboard creation for operational and performance analysis.

WORK EXPERIENCE

Waiter /Ayepyep lifestyle, Pretoria

Oct/2023 - Dec/2023

- Managed up to 10 tables simultaneously during peak hours, optimizing service flow and minimizing delays.
- Worked closely with kitchen and bar to align order timing, reduce customer wait times, and cut service errors.
- Tracked usage trends to inform back-of-house restocking and contribute to waste reduction.

Runner/ Ayepyep lifestyle, Pretoria

Jun/2022 - Sep/2023

- Oversaw inventory tracking for bar stock, proactively flagging low stock and reducing downtime.
- Ensured real-time order accuracy and client satisfaction under pressure, demonstrating adaptive logistics thinking.
- Led shift operations and coordinated service execution across high-traffic customer-facing environments.
